NEOFREIGHT

Enabling Smart Logistics

AGILE TRANSPORT MANAGEMENT SOFTWARE

FOR SMALL AND MEDIUM-SIZE FREIGHT FORWARDERS

It is a pleasure to introduce our software solution suite for international freight forwarders. **NEOFREIGHT** was designed specifically for small and medium-sized organizations. Our objective was to create a comprehensive solution that **helps manage all aspects of your business** while remaining easy to implement and use. **Our goal is to provide a set of tools that makes your team more efficient and competitive.**

“Simplicity is the ultimate form of sophistication”

Leonardo da Vinci

- Import - Export - Domestic
- All mode of transport (Air, Ocean, Ground)
- Integrated powerful accounting
- Multi-company, multi-division
- Powerful client self-service portal
- Data analysis
- Secure data sharing
- One fully integrated solution
- Paperless document management and sharing

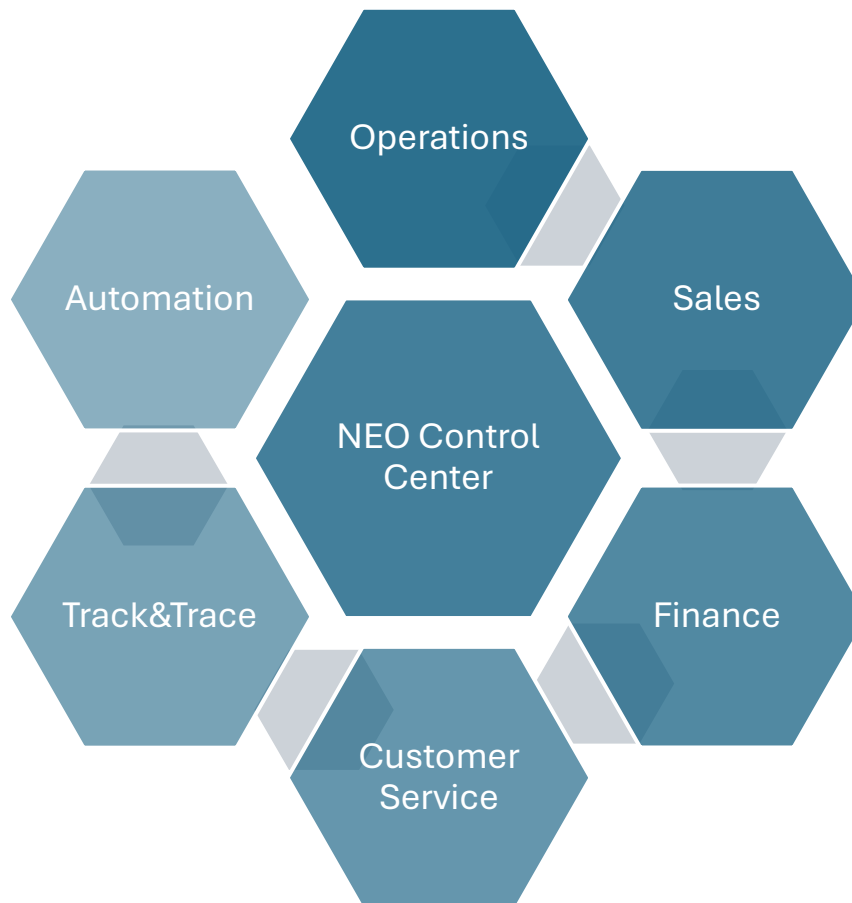

The perfect toolbox to compete with big players!

NEOFREIGHT

COMPREHENSIVE TRANSPORT MANAGEMENT SOFTWARE FOR SMALL AND MEDIUM SIZE FREIGHT FORWARDERS

NEOFREIGHT integrates all the functions required to effectively manage air , ocean , ground, and intermodal transport. With minimum data entry, users can quickly access their information, produce all import or export documentation, manage payables, generate invoices, and more... A **complete fully-integrated accounting module** provides real-time information to management.

“A fully integrated Solution to help manage all aspects of your business”

NEOFREIGHT

INTEGRATED TRANSPORT MANAGEMENT SOFTWARE FOR SMALL AND MEDIUM SIZE FREIGHT FORWARDERS

All your needs covered in one single, affordable, easy to use package!

NEOFREIGHT integrates all the functions required to effectively manage air , ocean , ground and intermodal transport. With minimum data entry, users can quickly access their information, produce all import or export documentation, manage payables, generate invoices, etc... A complete fully-integrated accounting system provides real-time information to management.

“As owner of a small freight forwarding company, I am struggling competing with big players.”

Efficiency

Centralizing all business activities within a single application streamlines your operations.

Your team gain time and maximize its efficiency with quick access to information and automation.

From quotations to execution, billing, accounting, financial and reporting, NEOFREIGHT streamlines all your activities into a comprehensive and yet user-friendly system.

Operations

NEOFREIGHT provides the functionalities to handle any type of shipments: air, ocean, ground, import, export, domestic, direct or consolidated. Each shipment is easy to manage throughout its lifecycle.

The system is designed specifically for small & medium-sized teams that require efficiency and flexibility. It is easy to learn and use, allowing your team to benefit quickly

Accounting

Freight forwarding operations involve many costs from multiple vendors in different currencies. NEOFREIGHT has been built to handle shipment costs and profitability in the most efficient way.

With our integrated accounting functions, you get real-time control on your operations profitability. NEOFREIGHT seamlessly connects operations and financials, eliminating the need for an additional external accounting system.

Visibility

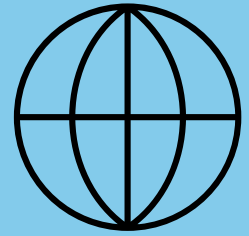

Today's clients expect maximum visibility on their shipments.

With NEOFREIGHT customer portal, you provide them 24/7 access to shipment status updates without generating calls or emails.

From the portal, clients can also submit quotation and booking request, access invoices and securely share documents with your team.

NEOFREIGHT

All mode of transport

Easy data entry

Regardless of the mode of transport, creating a new shipment is fast, and maintaining information is easy and efficient. Shipments can be created manually, from template, by copying existing shipments, via EDI, or directly from client portal.

Current & historical data

Easily access current and previous shipments

Track & Trace

Quickly find shipment and statuses by multiple criteria: Tracking #, PO#, Client, etc.

Documentation

Quickly produce, store, email and share all required documentation from a single data entry.

All modes of transport

Air – Ocean - Ground
Import – Export - Domestic

Projects

Manage small or large projects involving multiple shipments and track profitability per shipment.

Customizable milestones

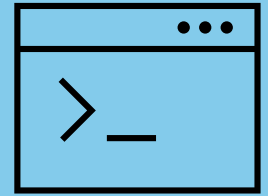

Establish standard milestones per mode of transport to ensure full traceability on your shipments.

“ Save time! “

NEOFREIGHT

Comprehensive Control Center

All freight forwarding operation files, regardless of the mode of transport (Air, Ocean, Ground, Import, Export, Domestic, Direct or Consolidated), are quickly accessible in NEOFREIGHT File Control Center. All information can be retrieved rapidly using multiple search options.

Share information

The **File Control Center** provides centralized access to all operation files, regardless the mode of transport.

Quick access to information

Files can be filtered or retrieved using multiple criteria: file number, consol no, dates, client references, mbl, air waybill, cargo control, container no, etc.,. When a customer is on the phone, locating the correct file takes only seconds!

Organize your teams

Transport files can be grouped by **office, team, department**, and more.

Efficiency

Users can create multiple views to show data on screen. Specific views, showing different columns can be configured to optimize the work for specific tasks.

Customizable views

Each user can create multiple customizable views, allowing to visualize specific data as desired.

Highlight exceptions

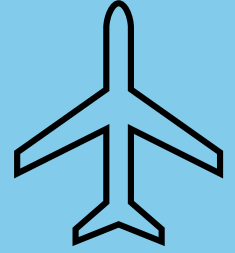

Highlight late demurrage-related dates to avoid charges. Use color-coded milestones to draw attention to items requiring action.

The screenshot displays the NEOFREIGHT File Control Center interface. At the top, there are three colored boxes indicating file counts: 0 Quote files (yellow), 62 Draft files (red), and 34 Open files (blue). Below this is a search and filter section with various dropdown menus for Client, Agent, Account Rep, and Consolidation. A central table lists various freight forwarding operations with columns for File date, File #, Client name, Carrier name, Shipper city, Shipper state, Shipper name, Consignee name, Consignee city, Consignee state, Client Reference, Client PD, Pallets, Qty, Unit, ETA, Cargo ready date, Pickup date, Delivery date, Status, and Milestone. The table includes rows for different clients like AZEZY DDOYA, WUHU CITY, AMERICAN AIRLINES, SWISSWORLD CAF, CHINA SOUTHERN, and CMA-CGM. A 'chain.io' logo and a circular progress indicator are visible in the bottom left corner. The status bar at the bottom indicates '100 entries loaded...'.

DEMO FREIGHT INC. Tel: 450-419-8008 Fax: 450-419-1265	

Customizable milestones

Establish standard milestones per mode of transport to ensure full traceability on your shipments.

- Manifests
- Packing lists
- Air Waybills
- House Air Waybills
- Pickup / Delivery instructions
- Pre Alerts
- Commercial invoices
- Certificates of Origin
- Labels
- Etc...

Streamline your air freight operations.

NEOFREIGHT

Ocean Freight

Easy data entry

Ocean freight screen layout is optimized for fast and logical data entry. Worldwide ports and terminals are supported, along with unit conversions, gross weight, CBM...

Demurrage and detention

Reduce Demurrage and Detention charges through visibility and alerts.

Import Shipments

Import shipments from Excel. Create and reuse client templates.

Direct & Consolidations

Manage direct and consolidated shipments. Handle single containers or multiple containers.

Track & Trace

Quickly find shipment and statuses by multiple criteria: Tracking #, PO #, Container #, Client, etc.

Customizable milestones

Establish standard milestones per mode of transport to ensure full traceability on your shipments.

Documentation

Quickly produce, store, email and share all needed documentation from one-time entries.

Efficient management of your Ocean Freight Shipments.

NEOFREIGHT

OTR Freight (Over-The-Road)

Easy data entry

For OTR (Over The Road) shipments, NEOFREIGHT provides flexible and efficient functions for quickly enter shipment information. Truck brokerage operations are managed seamlessly from quotation to execution and billing.

Multi-legs shipments

Handle multi-legs shipments with the same or different carriers.

Import Shipments

Import shipments from Excel. Create and reuse client templates.

Documentation

Quickly produce, store, email and share all required documentation from single data entry.

Carrier Instructions

Quickly email carrier instructions containing all shipment details and agreed rates.

Track & Trace

Quickly find shipment and statuses by multiple criteria: Tracking #, PO#, Client, etc.

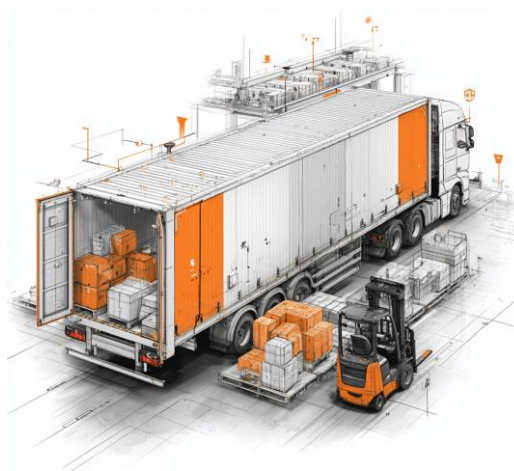

Customizable milestones

Establish standard milestones per mode of transport to ensure full traceability on your shipments.

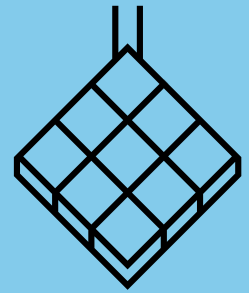

Bill of Lading
Carrier Instructions
Manifests
Pre alerts
Commercial invoices
Certificate of Origin
Labels
Etc.

NEOFREIGHT

Consolidations

All types of consolidation

NEOFREIGHT let you handle all types of consolidations: ocean (multiple house shipments within a container or across multiple containers), air, and ground.

Profit analysis

Within a consolidation, some costs (such as main transport) apply to the consolidation as a whole, while others (such as final delivery) may be specific to individual house shipments.

NEOFREIGHT takes this into account by allocating consolidation-level costs proportionally to each house shipment based on volume (CBM for ocean and ground, chargeable kilograms for air). This approach allows you to accurately determine the profitability of each house shipment within a consolidation.

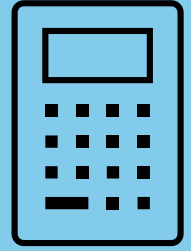

Documents

Documents within a consolidation can be quickly grouped. For example, if you manage a consolidation of 20 containers for three different clients, you can retrieve all relevant documentation (AWB, HAWB, pre-alerts, and more) for a specific client and email it in a single operation.

NEOFREIGHT provides all the tools needed to optimize operational efficiency.

NEOFREIGHT

Integrated Accounting

Multi-currencies

Multi-currency operations is part of the daily live of Freight Forwarders: Payable in foreign currencies, same clients billed in various currencies, exchange rate fluctuations, etc. You need a powerful tool to manage those transactions and get accurate numbers to compare results in your local currency. With NEOFREIGHT, the same client can be billed in multiple currencies, and you can still manage his credit limit in your local currency. Try that with generic accounting software!

Accrual accounting

Especially with ocean shipments, where billing and costs may span multiple accounting periods, managing accruals is essential for accurate financials. NEOFREIGHT automates the process, linking operations to accounting transparently.

Work in Progress (WIP)

A file created in the current accounting period may only be billed in a subsequent period. Similarly, accrual expenses and work-in-progress amounts must be maintained. NEOFREIGHT handles this automatically.

Revenue Recognition

Freight forwarding revenue is recognized when control of the goods or services transfers to the customer—either at a specific point in time (such as delivery) or over a period for ongoing services. NEOFREIGHT provides flexible options to recognize file revenues and costs at the moment you decide.

Analyzing Profit

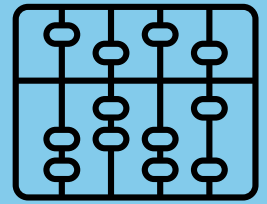

Managing a freight forwarding company means managing data. You need a clear, real-time, 360-degree view of operational performance. NEOFREIGHT helps you analyze profitability by file, lane, client, and more.

“Why is accounting a challenge for Freight Forwarders ?”

NEOFREIGHT

Integrated Accounting

No double entry! Your accounting is fully integrated with operations, providing real-time visibility.

NEOFREIGHT accounting is built specifically for freight forwarders.

While operations staff enter transactions with a focus on efficiency, NEOFREIGHT automatically generates all related accounting entries in the background.

€ Manage multiple currencies

NEOFREIGHT allows you to manage transactions in multiple currencies. The same client can be billed in different currencies. Client statements display all invoices grouped by currency.

All transactions, from sales to purchases can be done in foreign currencies.

The system generates automatically the profit/loss on exchange rate transactions.

Your financials are showing both in your local currency and in the original currency.

📈 File profit analysis

Multiple transactions can be associated with each individual file, regardless of the mode of transport.

- Accrual expenses
- WIPs
- Actual costs
- Invoices

That brings easy visibility on file profits. For consolidated shipments, consolidation costs can be allocated to each file proportionally based on CBM or chargeable Kgs, depending on the mode of transport.

① One single platform for all your needs

Centralize your data on a single platform. You don't need an additional accounting system. NEOFREIGHT let you manage both operational accounting and overhead transactions with the same system. It also supports **multi-company** environments.

File recognition

To comply with standard accounting rules in transportation, NEOFREIGHT automatically aligns sales and purchases based on the file recognition method can be configured in different ways. For example, it can be based on the first invoice generated in the file.

Accrual expenses and WIP

Especially for ocean shipments, transactions can often spread across multiple months. You may initiate a shipment in January, bill your client in February, and receive vendor invoices in March. To ensure your financials accurately reflect reality, NEOFREIGHT automatically maintains suspense and accrual transactions and reverses them once transactions are finalized.. This applies to both accrual expenses and work in progress.

Reporting, KPIs & Analysis

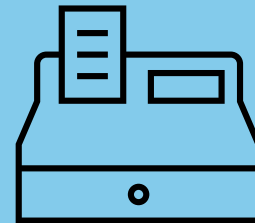

NEOFREIGHT provides a wide range of reports and dashboards to analyze your company's performance in real time. In addition, a data warehouse (BI) is available for further customized analysis.

For frictionless efficiency, you need a single integrated platform.

NEOFREIGHT

Accounting – Clients

NEOFREIGHT provides all functionalities to manage your client accounts in an efficient way.

\$ Billing

Multi-currency. Bill on **shipments** or on **consolidations** or enter miscellaneous billing. Invoices are showing all references and information without retyping. Consolidated invoices, for multiple shipments, are also supported.

Quickly email invoices with related documents automatically attached.

WIP

Work-in-progress entries can be entered as soon as the shipment exists. With its cost counterpart (accrual expenses), you see the expected profitability of the file even without completed billing.

% Tax management

Flexible tax management

Statement & Aging

Client statements and aging reports are multi-currencies. Email statements to your clients in one single operation.

Stack of coins Sales Commissions

A flexible commission system—based on profit, sales volume, or fixed fees—is available to generate sales commission reports. Multiple account representatives and operations managers can share commissions on transport files.

Credit limit & Hold

Credit limits are managed in your local currency. All outstanding invoices are analyzed using the current exchange rate.

Actions triggered when a client reaches their credit limit can be customized in multiple ways. For example, selected documents can be restricted to be produced. The response is immediate, as everyone in your organization is automatically notified.

Budgets

Flexible tools are provided to manage the revenue budgets per client.

Unlike most accounting systems, NEOFREIGHT allows to bill the same client in multiple currencies without creating multiple accounts.

The image displays two screenshots of the NEOFREIGHT accounting software interface. The left screenshot shows a 'STATEMENT OF ACCOUNT' for a client, detailing invoices in both Canadian Dollars (CAD) and US Dollars (USD). The right screenshot shows an invoice for a client, including a QR code and a table of quantities and amounts.

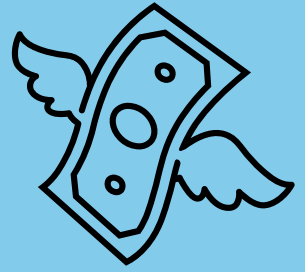

Invoice #	File #	Invoice date	Due date	Invoice Amount	Current	30 days	60 days	90 days

				TOTAL DUE USD		5,173.70		

Generate standardised professional professional-looking invoices that automatically includes all references for fast payment.

NEOFREIGHT

Accounting – Vendors

NEOFREIGHT provides all functionalities to manage your vendor accounts and maintain your accruals at the same time.

Manage both operation related expenses and overhead with the same system.

Vendor Invoices

Register and manage vendor invoices in multiple currencies.

With NEOFREIGHT, you can manage both operational invoices and overhead invoices (rent, phone, and more) within a single system.

Vendor Invoices Allocation

Vendor invoices related to operations are matched against operational purchase orders.

In the event of a mismatch (missing reference, amount exceeding expectations, and more), invoices are routed to **Pending Allocations**.

Operations staff can then amend purchase orders or reject charges as needed.

Accrual expenses

NEOFREIGHT provides all the functionality required to manage vendor accounts while maintaining accurate accruals.

- Expected costs related to transport files are entered by the operations team.
- Received vendor invoices are applied against purchase orders, decreasing accruals and increasing accounts payable.
- A detailed subledger displays the precise allocation of accruals by file, activity, and more.

With NEOFREIGHT accruals are automatically visible at any time!

Tax management

Flexible tax management, separating sales taxes handling from duty and taxes related to customs.

EFT - Electronic Funds Transfer

Pay your vendors through EFT. It is an easy process to pay many vendors in one quick step. Available for USD and CAD transfer.

Payable Aging

Client statements and aging reports are multi-currencies. Email statements to your clients in one single operation.

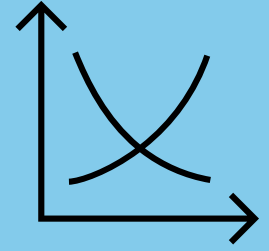

Cheques printing

Cheques can be printed from the system.

NEOFREIGHT

Accounting – Financials

NEOFREIGHT provides all the functionality required to manage your general ledger and produce financial statements.

Manage both operational expenses and overhead costs within the same system.

Entirely integrated to operations

All generated transactions from operations are automatic. Related transport files are identified in each general ledger transaction for improved analysis.

Multi-company, multi-department

With NEOFREIGHT, you can manage multiple companies and control multiple departments.

When creating operational transactions, the system automatically assigns the appropriate general ledger accounts based on department, mode of transport, and other criteria.

GL Reporting & Financials

NEOFREIGHT provides all standard accounting reports.

- General Ledger
- Trial Balance
- Transaction List
- Income Statement
- Balance Sheet

Multi-currencies

Foreign exchange rates can be entered every day, or when they fluctuates a lot. They must be updated at least once a month, before month-end.

NEOFREIGHT **Profit or Loss on exchange rates** function automatically create the appropriate GL transaction, ensuring your financials accurately reflect reality.

Tax management

Flexible tax management, separating sales taxes management from duty and taxes related to customs. The tax report automatically separate all tax types (to collect / to pay) for the given periods.

Budgets

A flexible General Ledger budgeting tool is provided.

Bank Reconciliation

All functions to perform bank reconciliations are integrated in the system.

Easy period closing

Period closing is easy. Operations can be closed separately from General Ledger. End-of-Year process can be reverted and redo if needed (for example when you receive adjustments from your external accountant).

All transactions can be exported to Excel.

NEOFREIGHT

Reporting

No double entry! Your accounting is entirely integrated with operations to provide you real-time visibility.

NEOFREIGHT accounting is built specifically for freight forwarders.

While operation people are entering transactions, with a focus on immediate efficiency, NEOFREIGHT generates all related accounting transactions in the background.

BI

NEOFREIGHT exposes **BI data warehouse** compatible with your preferred analytics tools (Excel, Power BI, and more. Strategic data is pre-aggregated for efficient and simplified analysis.

Manage multiple currencies

NEOFREIGHT allows you to handle transactions in multiple currencies. The same client can be billed in different currencies. His statements will show the all invoices grouped by currency.

All transactions, from sales to purchases can be done in foreign currencies.

The system generates automatically the profit/loss on exchange rate transactions.

Your financials are showing both in your local currency and in the original currency.

File analysis reports

Reports are available to measure the profit per file, per carrier, per client, etc....

With NEOFREIGHT, you can generate many reports based on different criteria. These reports can easily be exported to Excel for further analysis.

For friction-less efficiency, you need one single integrated platform.

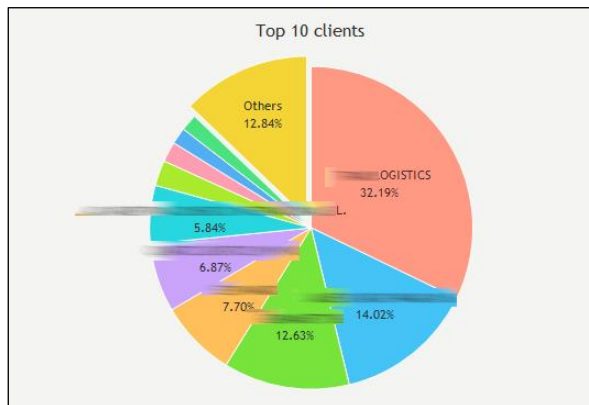

File profit analysis

Multiple transactions can be associated to each individual file, regardless of the mode of transport.

- Accrual expenses
- WIPs
- Actual costs
- Invoices

That brings easy visibility on file profits.

For consolidated shipments, consol costs can be spread on each file proportionally of CBM or Kg chargeable depending on the mode of transport.

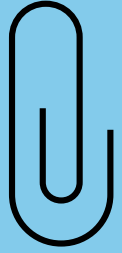

Reporting, KPIs & Analysis

NEOFREIGHT provides you with multiple reports and graphics to analyze your company performance live.

In addition, a data warehouse (BI) is available for further customized analysis.

NEOFREIGHT

vDocs to work paperless!

vDocs is a centralized document repository

NEOFREIGHT let you attach multiple documents to organizations, shipment files, vendor invoices, and more within a centralized repository called vDocs (virtual documents).

Various document types can be added: **PDF, images, excel sheets, word documents**, and more.

Documents produced by NEOFREIGHT can be automatically stored to vDocs. External documents can also be added.

Go Paperless!

Regardless of where your team is located, they have secure access to all operational documents.

Private or Public

Documents in vDocs can be set as public (visible to clients via the portal) or private (restricted to your organization).

You can also configure some document types (ex.: PODs) to be automatically attached when emailing invoices.

Client document sharing

From the customer portal, clients can access shared documents related to their shipments.

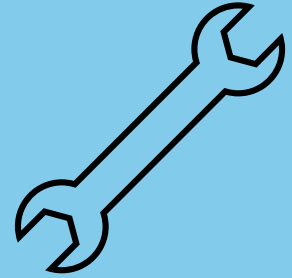

They can also upload documents, such as commercial invoices, which become immediately available in your vDocs repository.

The screenshot displays the vDocs interface for document AE-019078-01. On the left, a sidebar lists various documents with their status (Public or Private) and file types (PDF, XLSX). The main area shows a detailed Air Waybill document for Turkish Airlines, including shipper and consignee information, flight details, and a summary table.

No. of Pieces BCP	Gross Weight	M3	Net Weight	Chargeable Weight	Rate / Charge	Total	Nature and Quantity of Goods (incl. Dimensions or Volume)
1	100.000	K		167.000	0.00 /kg	0.00	CONSOLIDATION AS PER ATTACHED MANIFEST 1x100x100x100cm

NEOFREIGHT

Features Rich

NEOFREIGHT was designed with numerous advanced features that make it especially effective for real-world, day-to-day operations.

Export Everywhere

As soon you have a list on screen, just right-click to export to Excel.

Easy and powerful Imports

Flexible and easy-to-use tools allow you to import data from Excel, including organizations, shipment files, purchase orders, and more. You can visually map Excel fields to NEOFREIGHT and save the mapping for future use.

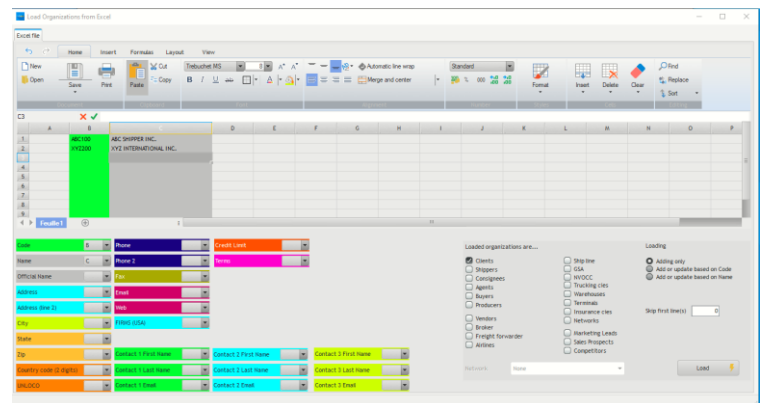

Powerful data browsing

Columns in any on-screen list can be filtered and searched using multiple criteria (equals, contains, greater than, between dates, and more).

User Automation Features

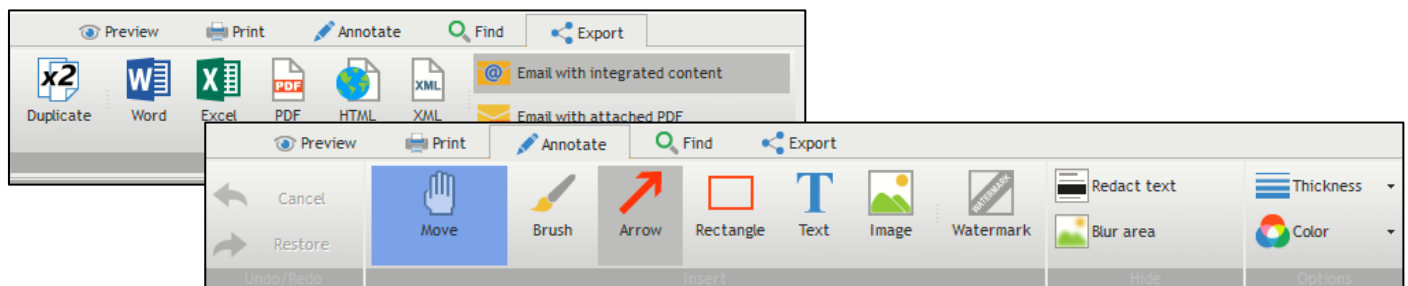

The application offers many little built-in functionalities customizable by users. These details significantly enhance user satisfaction and productivity.

Report everywhere

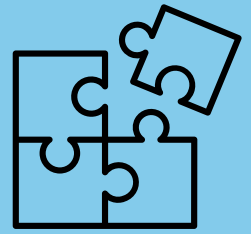

Reports can be printed, view and exported.

NEOFREIGHT report viewer offers powerful features that enhance flexibility, including export to Word, Excel, and PDF; document annotation; watermarking; and pre-print editing.

NEOFREIGHT

Integration

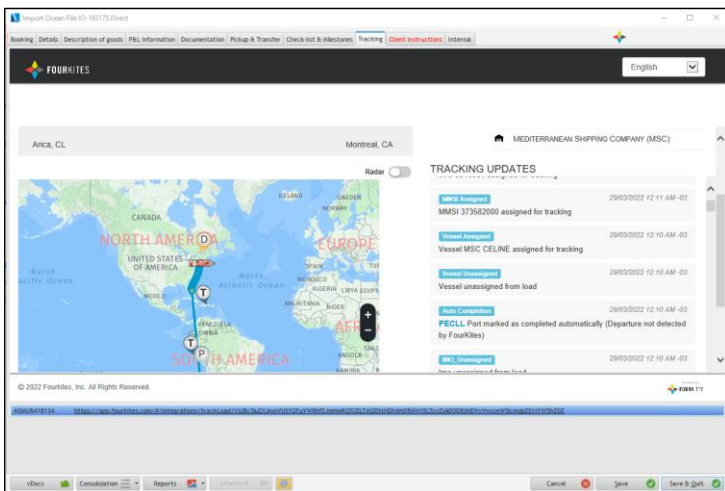

NEOFREIGHT is open to multiple specialized platforms, allowing you to extend functionality across your operating environment.

Connect with shippers and logistics partners worldwide through seamless data interoperability. Receive shipments and consolidations from your overseas agent directly in NEOFREIGHT.

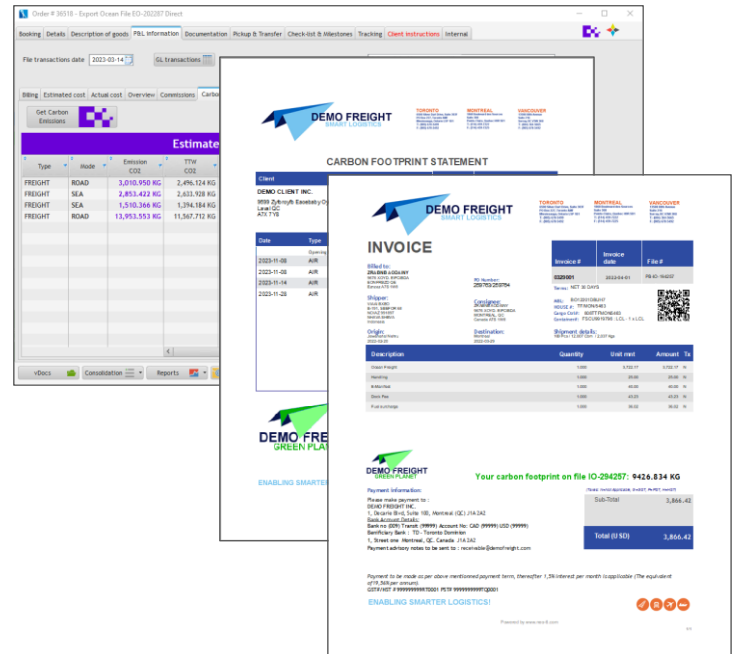

Empower your clients with full visibility on their shipments. By integrating FOURKITES with NEOFREIGHT, you show your company as a true up-to-date partner.

CARBON EMISSION REPORTING

Enable your clients to measure and report their carbon emissions by integrating pledge.io with NEOFREIGHT. Carbon emissions are automatically calculated and reported at the shipment level.

MEADE WILLIS

Through our partners Meade Willis, a global EDI software service provider, NEOFREIGHT can integrate with supply-chain partners worldwide.

NEOFREIGHT

Client portal

Integrated with NEOFREIGHT, the client portal enables self-service access 24/7.

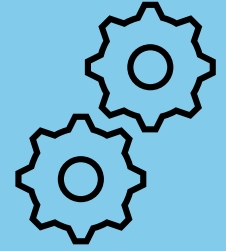

Provide information with fewer emails and phone calls.

- Shipment statuses
- Customizable views
- Customizable dashboard
- Request for Quote
- Request for Booking
- Document sharing
- Private Address book
- KPIs

The screenshot displays the NEOFREIGHT client portal interface. At the top, there are navigation icons and a 'DEMO' label. The dashboard features several key performance indicators (KPIs): 'No. of Shipments' (289), 'Active Shipments' (105), 'Arrival Report' (157), and 'Departure Report' (161). Below these are three charts: 'TOTAL SHIPMENTS (IMPORT/EXPORT/TRANSIT)' showing a line graph over time, 'TOTAL SHIPMENTS BY DEPARTMENT' showing a stacked bar chart, and 'TOTAL SHIPMENTS BY COUNTRY' showing a donut chart. The main area is divided into 'UPCOMING ARRIVALS' and 'UPCOMING DEPARTURES' tables. A detailed view of a shipment (EO181673) is shown, including its status (Normal), origin (Saint John's), destination (Saint John's), and carrier (OCEANEX INC). Below this, an 'ORDER' summary for EO193097 is displayed, including order date, HBL number, HBL type, and a world map. The 'ORDER DETAILS' section provides a comprehensive overview of the order, including shipper and consignee information, number of pieces, description of goods, routing, and a table of milestones with dates, times, and descriptions.

NEOFREIGHT

Flexibility, Customizable

It is your system – You can customize it to your own needs.

NEOFREIGHT is provided with a set of data to start with but everything can be set to your own preferences.

BI

NEOFREIGHT exposes BI data warehouse for your preferred analytics tools (Excel, Power BI, etc....). Strategic data is already aggregated for easy and efficient data analysis. You can easily create your own reports and KPIs.

Ports / Airports

We supply NEOFREIGHT with most worldwide ports and airports with their official codes. Once installed, you have full control over the database. You can modify the codes, add ports or airports, etc. The data is yours.

Personalized dashboard

Configure your own dashboard to display the KPIs you want.

Your data

All data is entirely configurable.

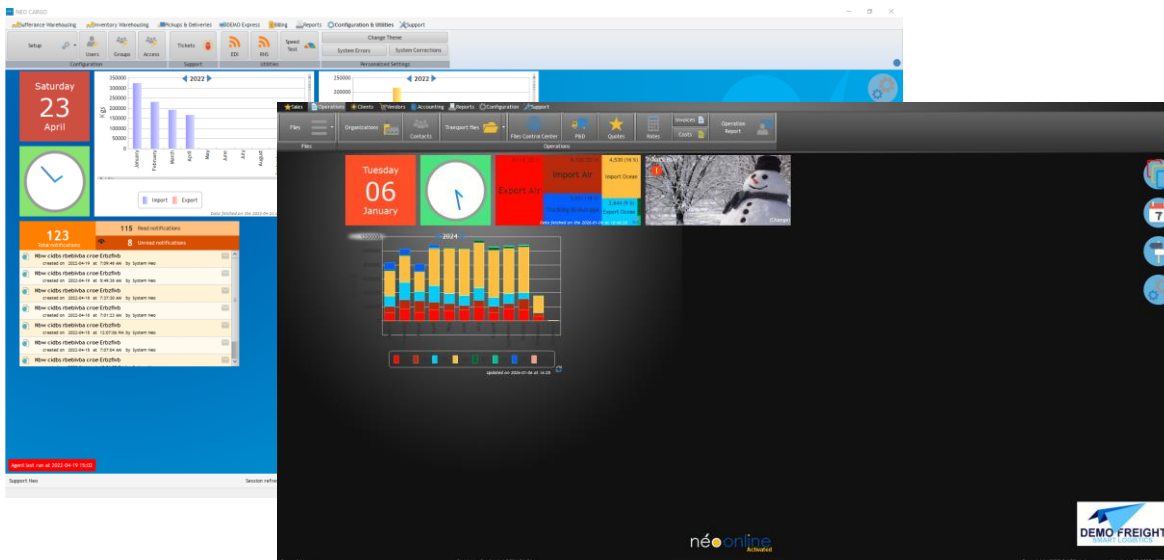

- Activity codes
- User teams
- Billing codes
- Receivable / payable terms
- Traffic codes
- Tags

You configure the system for your own requirements.

Scheme

Each user can select his preferred scheme, with different color set for a comfortable interface.

NEOFREIGHT

Quick Onboarding

NEOFREIGHT is one of the fastest ERP/TMS solutions to implement.

You can be live within days.

“ Easy configuration and training help you achieve ROI quickly! “

Fast configuration

Ease of use

Personalized assistance

Flexible deployment

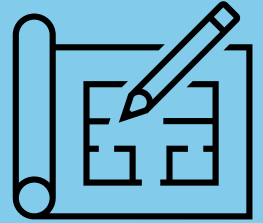

NEOFREIGHT can be installed on your premises or hosted in your preferred data center for secure access from anywhere.

You retain full ownership of your database.

NEOFREIGHT

Customization and extensions

NEOFREIGHT can be adapted to any particular needs.

Custom software development

NEOFREIGHT is highly flexible, but certain business requirements may call for additional features. The system is designed to support customization. Our professional team can program specific functions you may need.

NEO ecosystem

NEOFREIGHT is part of a broader logistics software ecosystem. We provide solutions for 3PL warehouses, bonded warehouses, trucking companies, and more. All solutions share a common database structure, enabling seamless integration and allowing you to build a comprehensive logistics IT environment.

We understand logistics. Let's discuss your needs and vision so that, together, we can build the solution that fits your business.

NEOFREIGHT

About us

NEO6.

NEO6 is a software company specialized in logistics solutions.
