Transforming Last-mile delivery
for Shippers

For Shippers

Managing customer expectations, adapting to seasonal demand fluctuations, managing delivery delays, providing real-time tracking and visibility, etc... There are many challenges in delivering goods to final destination.

B2B delivery Challenges

Because B2C orders are mainly small packages, last mile delivery usually relies on courier companies such as Fedex, UPS, etc... In this case, the main challenge is to choose the proper courier and service for the specific address and integrate with them for sending ship orders, following delivery statuses and getting the proof of delivery.

B2B can be more challenging if deliveries are pallets or bigger shipments. Transport could be done with the shipper own fleet, by 3rd party carriers or a mixture of both.

“I want to enhance my last-mile delivery operations”

Delays

Getting sales orders to customer involve a network of partners such as logistics companies, fulfillment centers and other order fulfillment businesses. Any interruption, from any of these players, can cause delays that would breakdown promised delivery timelines.

For some clients, relying on the effective fulfillment of the ordered products can have a dramatic impact on their operations.

Routing

Route planning and smart selection of the transportation hub are key factors to efficiency. Each stop, for cross-docking or for local inventory closer to client, creates friction in the processes. Each physical manipulation slowdown operations, complexifies processes and creates a higher risk of errors.

Planning carefully the most effective routes with the most strategic hubs will increase the efficiency and lead to a better customer satisfaction.

Costs

In addition of involving third-party partners, infrastructures, and other direct cost, last mile delivery management requires a lot of resources.

From optimizing routes and third-party partners to managing day-to-day operations, employees responsible of last mile delivery represent an overhead cost that can be substantial.

Visibility

Today's buyers want maximum visibility on their deliveries. In a mixed environment, where deliveries can be done with an own fleet or with third-party carriers, that can be challenging.

A streamline process, automating tracking of shipment statuses and on-line access to proof of delivery will provide real-time information to customers as well as releasing internal resources from time-consuming manual processes.

SHIPX

SHIPXTMS+ is designed to enhance your last-mile delivery operations.

Logistics solution for Shippers

SHIPX is a SaaS **secure** and **scalable, multi-language**, logistics solution that is available from anywhere. Regardless the size of your organization, SHIPX provides tools for operational logistics efficiencies. SHIPX helps by streamline your processes with full visibility and automation, providing a rapid ROI. Your logistics team will be able to focus on exceptions and quality service instead of repetitive unproductive work.

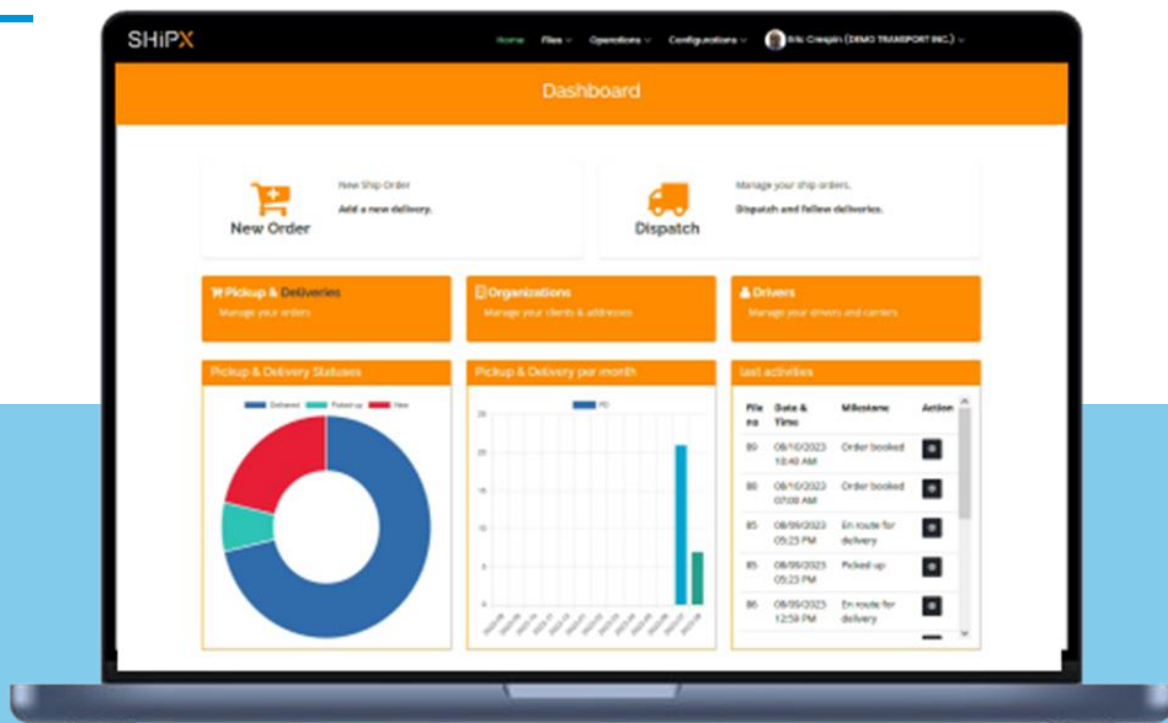

Sales
Orders

Cross-dock

Dispatch

Delivery

From sales order to final delivery, SHIPX provides full visibility to all parties: Customer service teams, Accounts executive, Clients...

SHIPX

Benefits

Optimize and simplify your logistics operations with SHIPX and get immediate benefits for your organization.

Improve your Customer Service

With real-time access to delivery information, your customer service department will spend less time on the phone and can focus on real problems.

Better productivity

Through automation, your logistics team will do more with less manual efforts.

Optimize your order delivery operations

Quickly find shipment and statuses by multiple criteria: Tracking #, PO#, Client, etc...

React faster

With real-time access to information, you can react faster and make sure orders are delivered on time.

Become Paperless

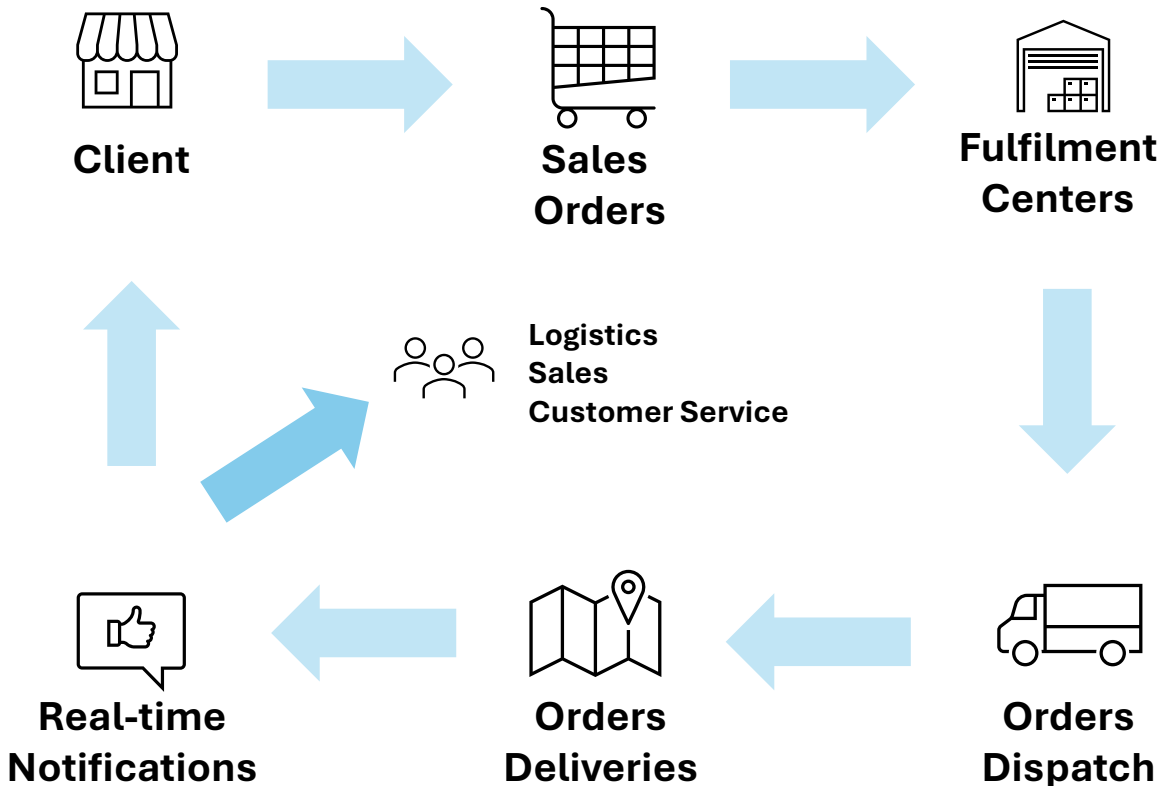

Save cost associated with paper-based processes.

SHIPX is perfect for
National or **Local**
Distributors or
Manufacturers.

Integrated with your ERP / WMS

SHIPX can integrate directly with your ERP, eCommerce platform or WMS for seamless operations. For example, sales orders ready to ship from your Tecsys Elite™ WMS can load automatically into SHIPX for automatic dispatching.

Flexible Dispatch

SHIPX provides your team with a centralized system for routing and dispatching orders, regardless of the transportation mode (**in-house fleet** or **3PL carriers**). Using our powerful file central management, every member of your team has **on-line live information** on all delivery operations.

SHIPX makes dispatching easy. Orders to deliver can be automatically routed to the proper carrier. SHIPX let you pre-defines routes or automatic dispatch by zone, by city or by zip/postal code. Unattended or unscheduled pickups and deliveries are easy to dispatch to your own fleet as well as to 3PL carriers.

The screenshot displays the SHIPX Dispatch interface. At the top, there is a navigation bar with the SHIPX logo and user information for Eric Crespin (DEMO TRANSPORT INC.). Below this is a search bar with filters for Page Size (10), Search, Driver (Select Driver), Route (Select Route), City (Select City), and Status (New, Picked-up, Delivered). A table titled "Dispatch List" contains 8 entries with columns for File no, Reference, Requested Date & Time, Status, Skids, Client, Pickup, Zone, Driver, Delivery, Zone, Driver, Route, Tags, and Action. The table shows various orders with different statuses like "New" and "Picked-up", and includes tags like "RUSH" and "Heavy Load".

Automatic routing

city, zip or address
Routes per city or zip

Your fleet and carriers

With SHIPX, you can dispatch easily to your own drivers or to 3PL carriers.

Customizable milestones

Configure your own milestones to ensure full traceability on your deliveries.

Dangerous Goods

SHIPX handles multiple regulations and offer full control over DG codes. **Dangerous Goods Declaration** is produced by the system.

Line-Haul

Simplify your line-haul operations with easy **Consolidation and Deconsolidation**. Configure multiple transport hub to optimize your operations.

“So easy to use!”

Automatic routing & dispatching

Routes

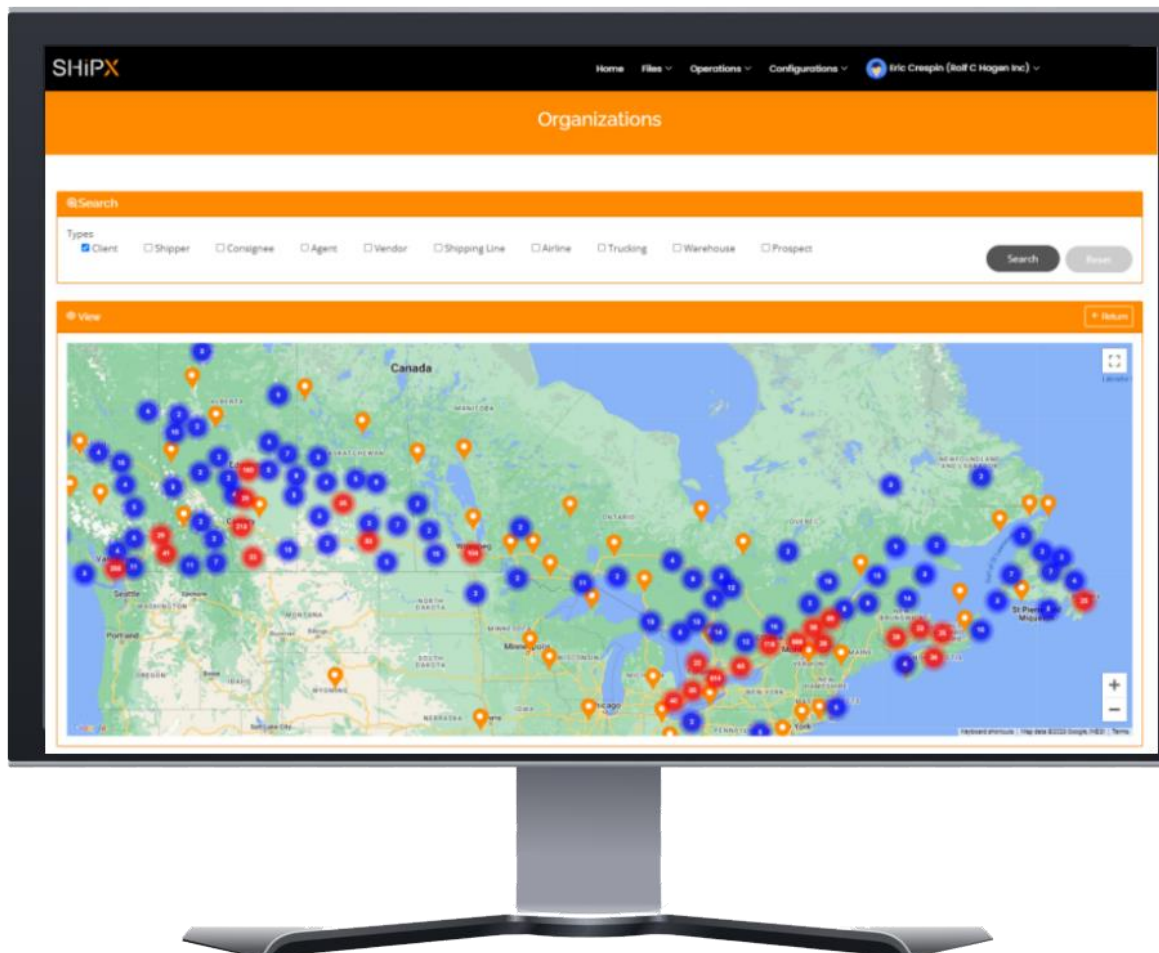

Create your delivery routes by client, by city or by zip (postal) code.

Zones

SHIPX supports multiple zones configurations simultaneously. Zones can be automatically assigned by city or zip (postal) code.

Driver / Carrier assignment

Drivers (or 3rd party carriers) can be assigned automatically.

Easy visual dispatching

Overview

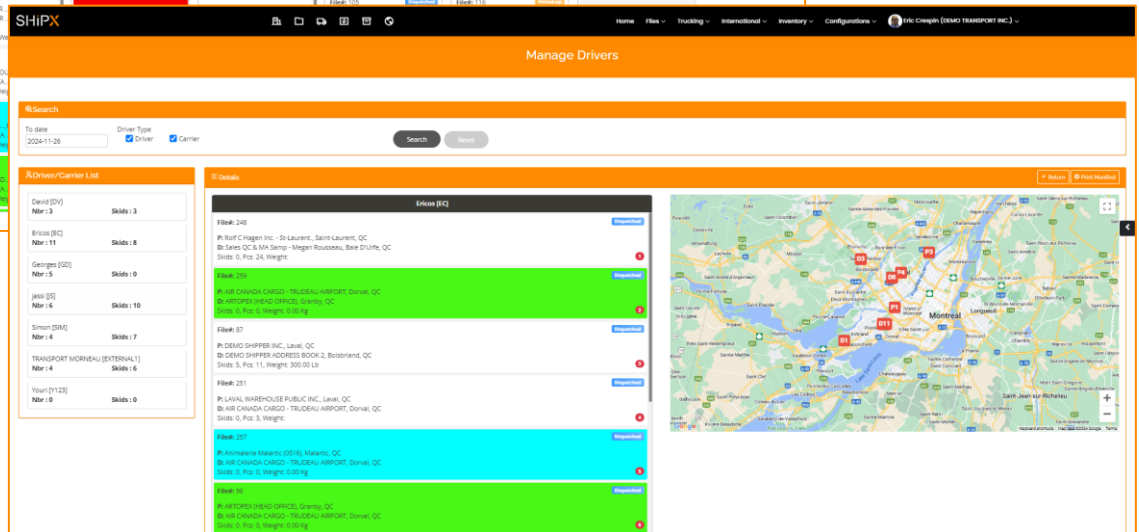

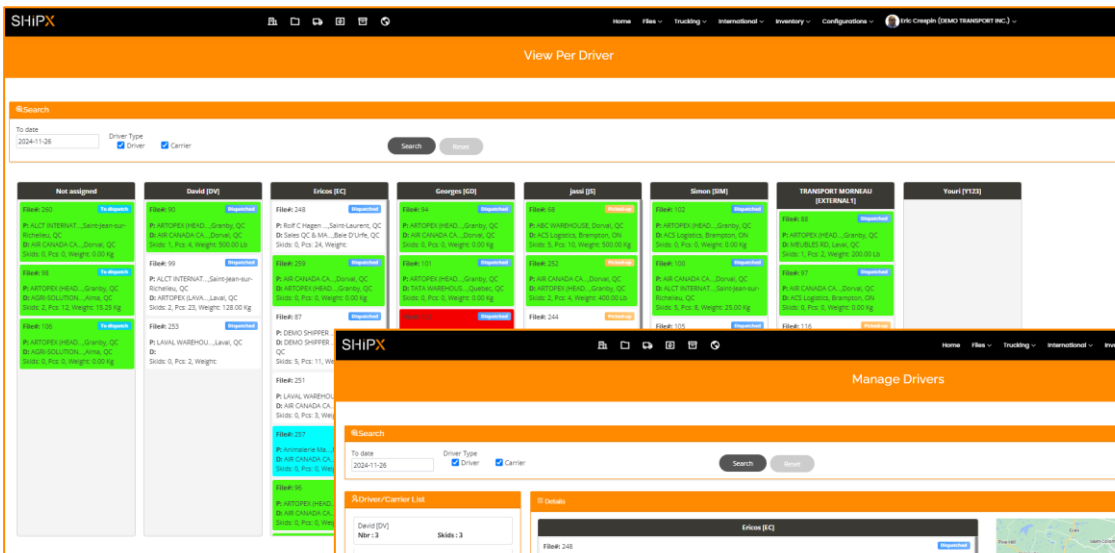

Get an overview of your Drivers / Carriers workload.

Reassign delivery orders

Easily drag & drop the load to assign Drivers (or 3rd party carriers).

Delivery sequence

Change the sequence of the deliveries with a simple drag & drop.

Route Optimization

Optimize your route deliveries using integrated google route optimization.

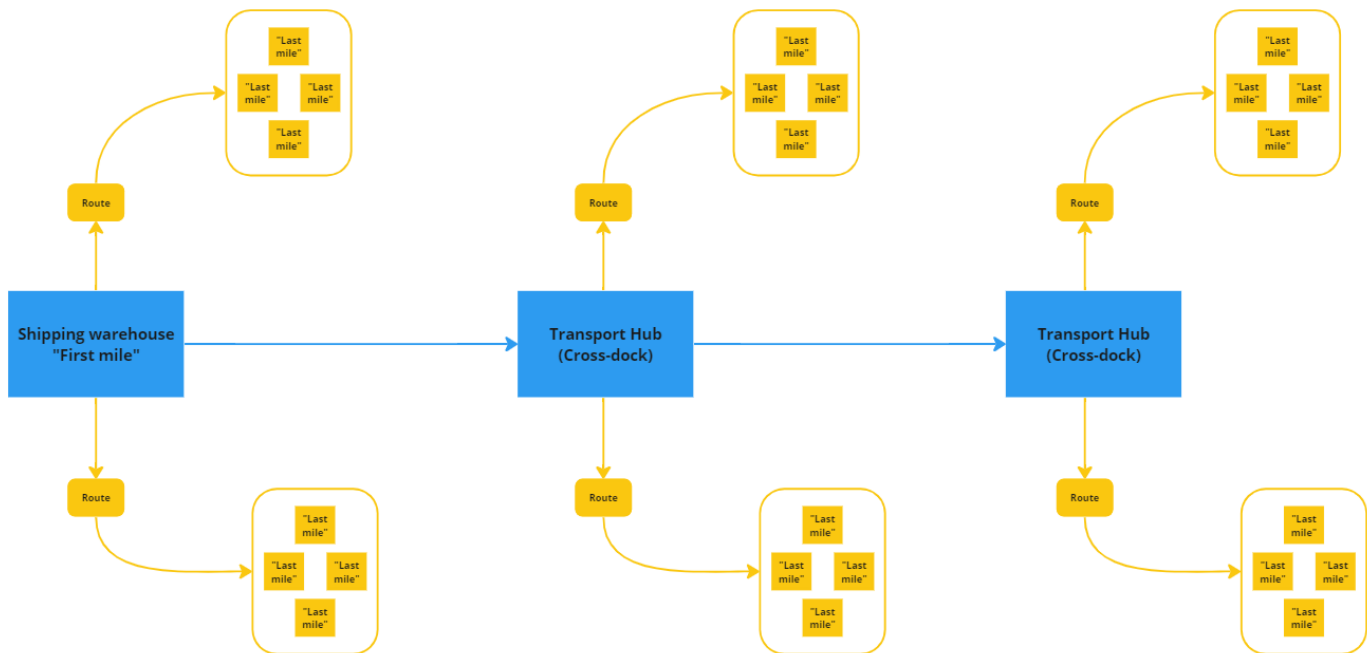

Loading Plan

Provide your drivers with a loading plan for his route.

Multi Transport Hubs Cross Dock

If your organization is delivering from multiple fulfillment centers and if you are using transport hubs to optimize your logistics, take advantage of SHIPX multi-hub capabilities. As soon your order left the origin warehouse, the full routing between transport hub is assigned to the delivery. Then deliveries will be automatically routed to the proper path of transport hub up to final delivery.

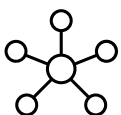

Multi-Hub routing

Routing through multiple transport hubs can be predefined for each final delivery routes.

Line-Haul dispatch

Deliveries going from a transport hub to another can be consolidated in line-haul. A manifest is generated automatically.

Cross-dock operations

Cross-docking operations can be handled in SHIPX at transport hub to insure reliability of the planned routing.

Full visibility

Line-haul milestones are fully visible in each related deliveries. Each movement, from origin fulfillment center to each line-haul and cross-dock and to final delivery are available in real-time.

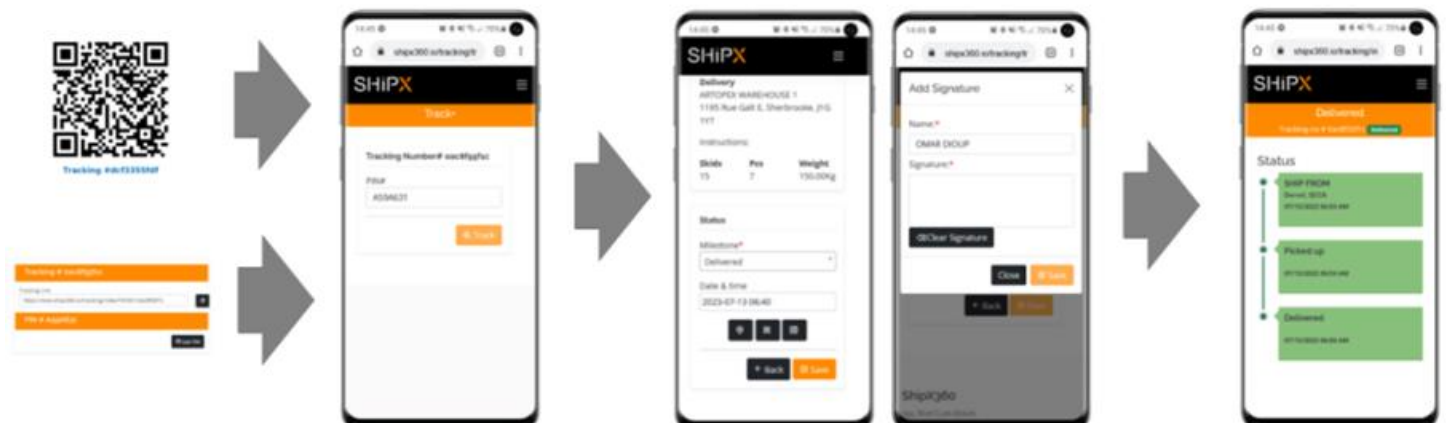

Scan to Track!

Scanning the QR code on the bill of lading automatically opens the tracking screen. Provide a system-generated PIN# to the person that made delivery and he can perform all tracking tasks for this delivery: Enter milestones (pickup, delivery, signature, photo, etc...). All this from their phone **without having to download the mobile application**.

- 1 Driver scans the QR code
- 2 Give scan code to driver
- 3 Driver enter status, signature, photos...
- 4 POD is done!

**Perfect solution
when using 3rd
carriers**

No need to install an application on their phone.
Quickly done on the fly!

Print & Email documents

Manifests

Print or download in PDF format.
Email automatically to the drivers (or 3rd Party carrier).

From one single origin

Show one single origin (usually a warehouse) with multiple destinations for deliveries.

Multiple origins & destinations

Shows the specific origin and destination for each deliveries.

NOTICE OF CLAIM:
In the event of a claim for loss, damage or delay, to any goods covered under the bill of lading unless notice thereof setting out particulars of the claim, and the amount claimed in respect of such loss, damage or delay, is given in writing to the originating carrier or the delivering carrier within sixty (60) days after the date of the goods, or, in the case of failure to make delivery, within one (01) month from the date of shipment together with a copy of the said freight bill.

IN THE EVENT OF LOSS OR DAMAGE TO THE GOODS, THE CLAIMANT SHALL BE RESPONSIBLE FOR THE COST OF INVESTIGATION AND REPORTING.

INDIVIDUALLY PACKED OR UNPACKED GOODS SHIPPED AT SHIPPER'S RISK AND SUBJECT TO TERMS AND CONDITIONS AVAILABLE ON WWW.DEMOSHIPPER.COM

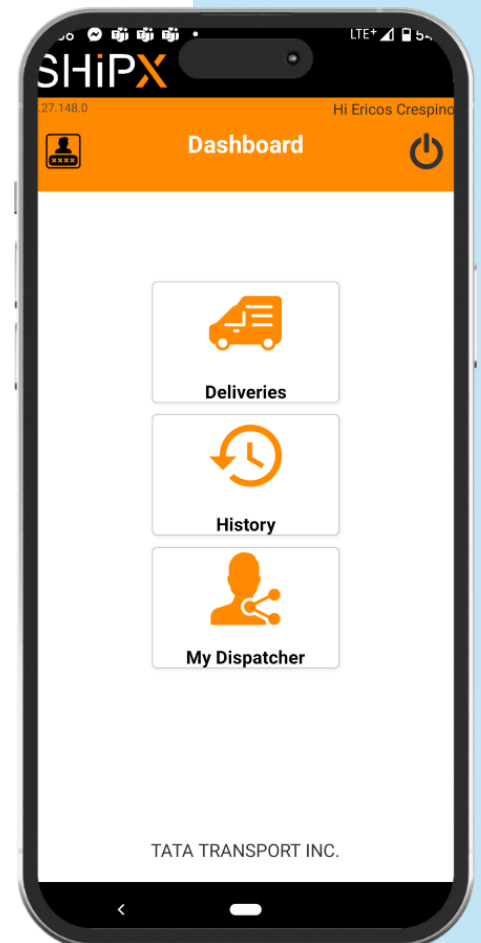

Manage your own fleet

If some or all deliveries are handled with your own fleet, SHIPX provides all tools for dispatching and managing drivers.

With its easy-to-use mobile application, drivers are integrated in real time with your operations.

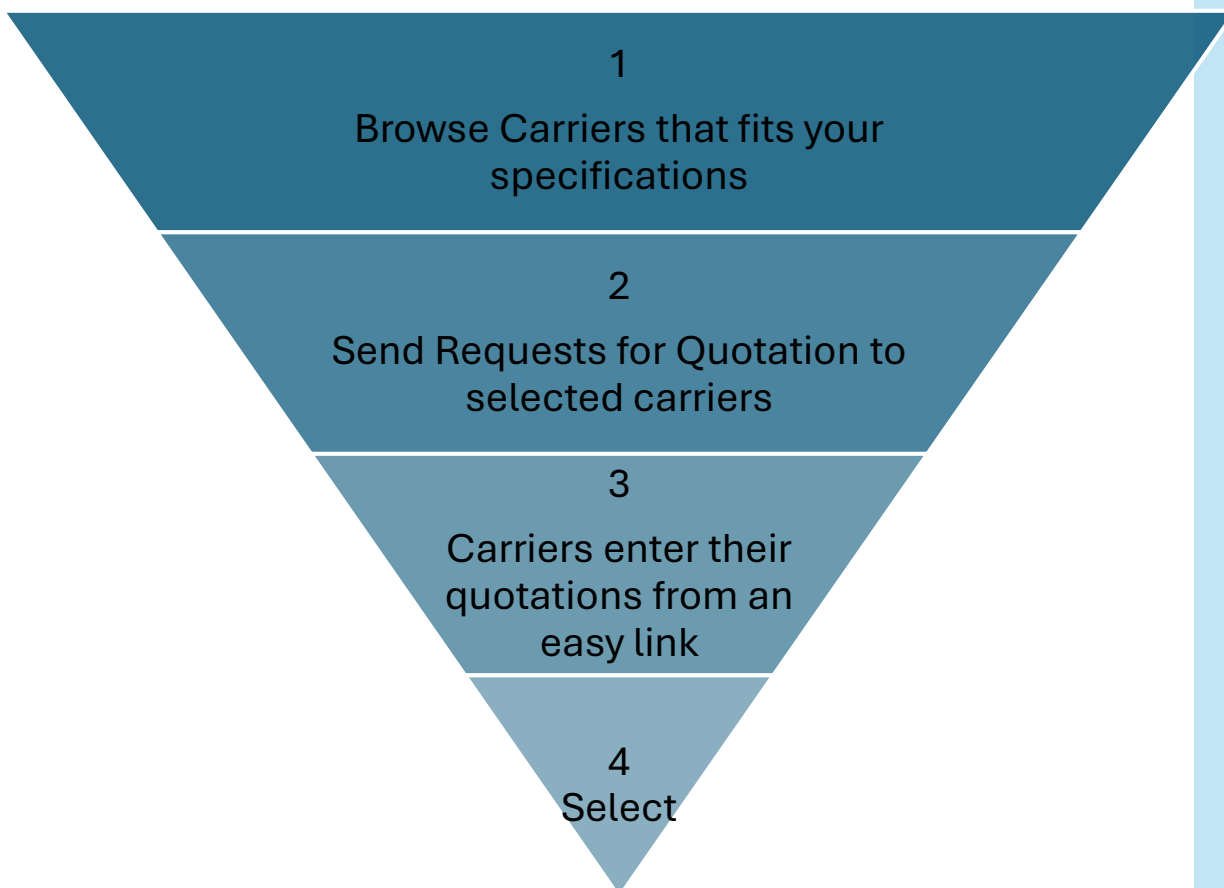

- **Real time visibility**
- **Mobile application**
- **Mobile web app**
- **Proof of delivery**
- **POD Signature**
- **Pictures**
- **Special instructions**
- **Appointments**
- **And much more!**

Manage 3rd party carriers

In addition of API integration, **SHIPX** helps you find, compare and select **the best 3rd party carrier** for your shipments.

Carrier instructions

Send carrier instructions and related bill of lading in one click.

Ideal for spot quotes from non-integrated carriers

You filter carriers from your database for specific services, equipments, geographic coverage, etc.... Then, in a few clicks, you send each of them an email requesting a quote for your shipment. They just have to click on the provided link to enter their quote information.

You can easily compare their quotes, select the best one for your shipment and send the carrier instructions (with attached Bill of lading).

Get the best rates

Make sure to find the best market rates – even for manual carriers...without adding extra work to your team!.

Track Everything!

With **SHIPX**, you can track shipments, material movements, services, and more in **real time** using mobile phones or handheld scanners.

Flexible Milestones

Milestones can be associated with delivery steps, exceptions, actions, or any event you want to track, such as:

- On the way to pickup
- Picked up
- Delivered
- Damages
- Goods verified
- And more

You define your own control points based on your business requirements.

For each milestone, you can also specify the required action, such as: Get a signature

- Capture a signature
- Take a photo
- Add a note
- And more

Milestone visibility

In addition to viewing milestones in the client portal, clients can receive automatic notifications for selected milestones. For each milestone, you can define whether it is visible to clients or remains private.

Internal alerts can also be configured to notify your team when specific milestones occur.

Visibility & Collaboration

With SHIPX, everyone in your organization, as well as your clients, collaborate and share information and documents through your organization portal.

Logistics team

Your logistics team can access all information about all deliveries

Account representatives

Your account representative team can access all information about their own clients

Clients

Provide your clients with on-line direct access to their deliveries

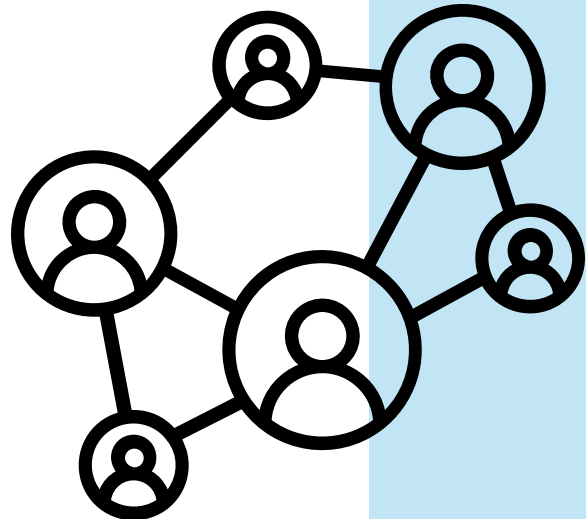

Warehouses

Your fulfillment warehouses have access to all delivery information on the client deserved by their location

Buil your own portal

Customize the look & feel of your portal to your company branding (Logos, colors, announcements, etc...)

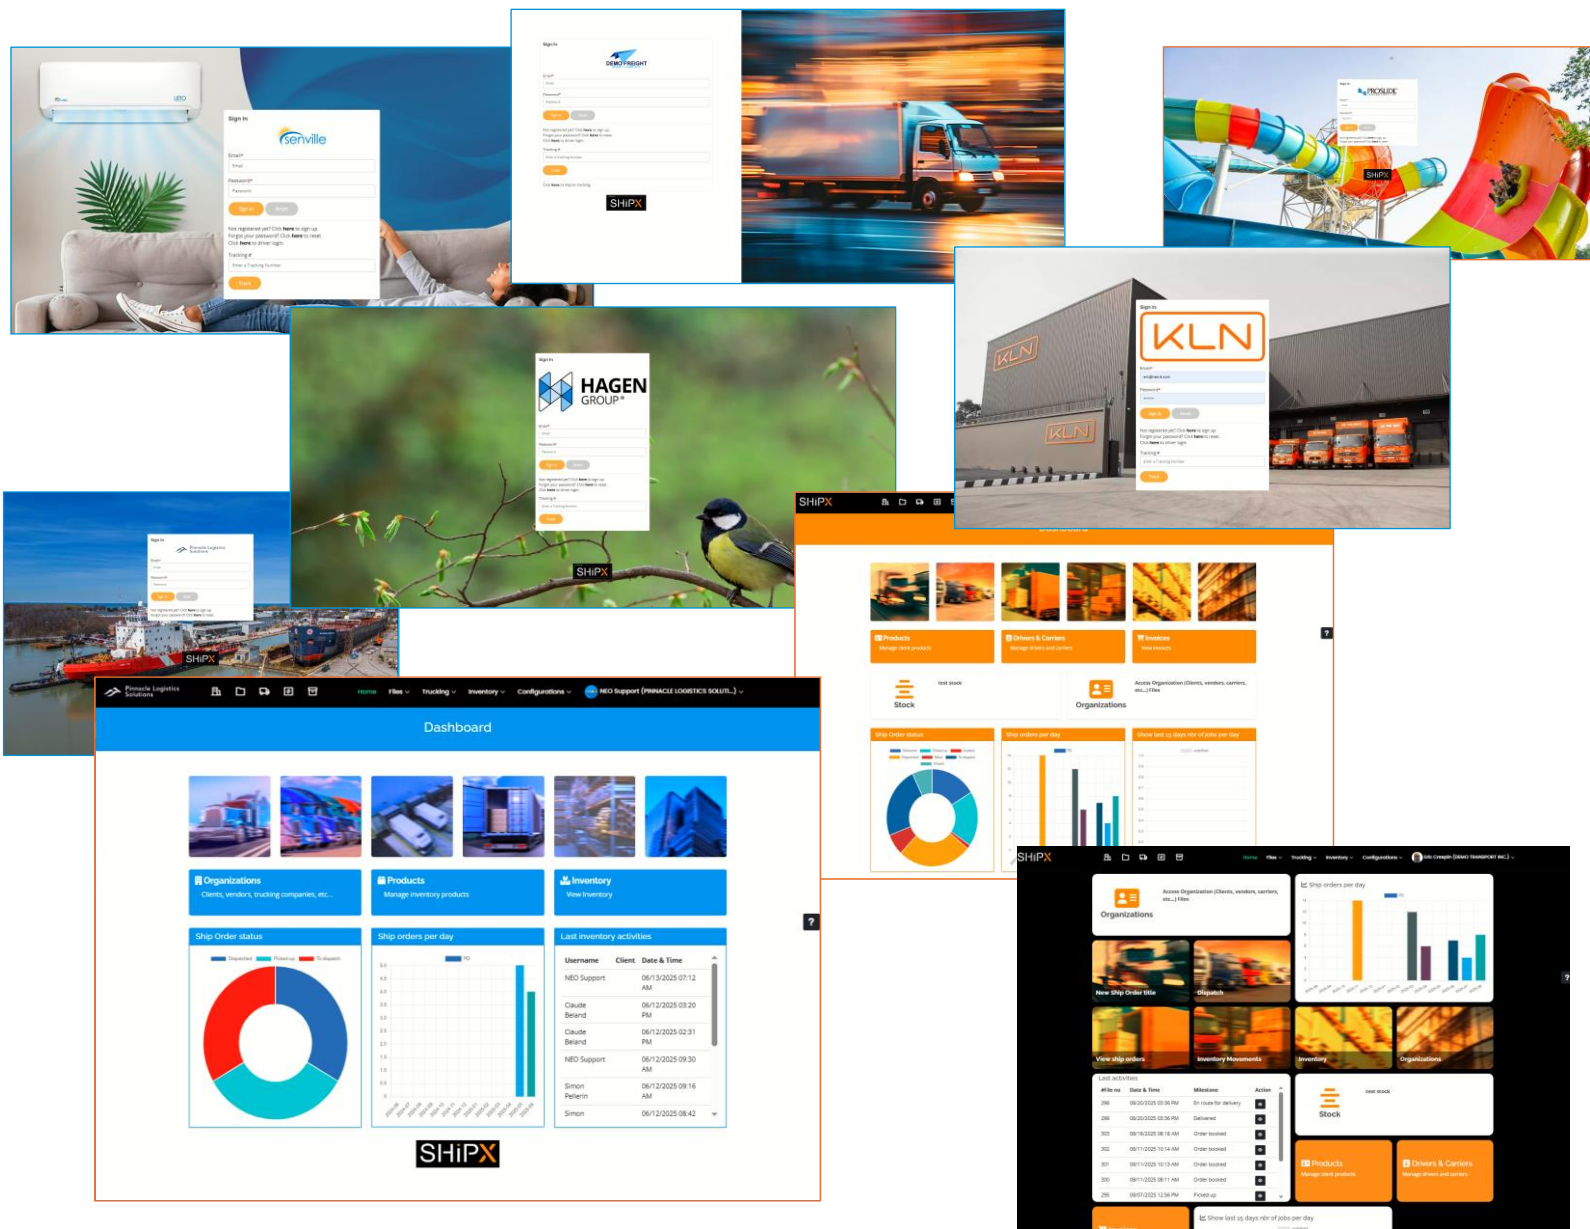

SHIPX

TMS+

Customizable interface

SHIPX interface can be customized to your company image. Integrate your logo, choose theme colors for screen and documents, design your own dashboard, etc...

Make it yours!

Quick Onboarding

- ✓ Quick configuration
- ✓ Ease of use
- ✓ Web deployment
- ✓ Personalized assistance

“ Easy configuration and training allows you to get your ROI quickly! “
